STAKING

STAKING STRUCTURE ON USDTSCAN AND REWARDS DISTRIBUTION

Stake your USDT in one click and start generating yield easily with token quantity protection and slashing coverage. You will get USDTChain as the tokenized representation of your staked USDT in a 1:1 ratio, allowing you to take advantage of the liquidity as well as enjoying the rewards of USDT staking.

PROFITABLE ALTERNATIVE TO HOLDING ASSETS

Staking is a profitable alternative to simply holding cryptocurrencies in a wallet, like an analogue of a bank deposit in the crypto industry. The yield of USDTSCAN staking differs depending on the liquidity pool, and its value can reach from a few hundredths per day to tens of percent per month or more.

(TRX Price=\$0.06, Flexible Rate=0.04% ⇒ Flexible BA=165 USDT)

NB: Breakeven Amount - The minimum Staking Limit for receiving positive income at a fee value of 1.1 TRX = \$0.066 and a profit rate of 0.03% per day on Flexible Staking and 0.20% per day on Fixed Staking.

! Transaction fee may vary depending on the Blockchain workload, so we recommend you regularly monitor your TRX balance.

!! If there is no TRX on the USDTScan Wallet balance, the system will not be able to send funds to MemPool to form a profitable Liquidity Pool due to the lack of commission payment and the income for the current day will not be credited.

!!! For a positive USDT equivalent profit, stick to activating the minimum Staking Amount (see Breakeven Amount).
